### **ABOUT YOGI VEMANA UNIVERSITY**

Yogi Vemana University is one of the state universities established by an act of Govt. of Andhra Pradesh in March, 2006 which was previously Sri Venkateswara University Post Graduation Center. The University is located 15 kms away from Kadapa city on Kadapa - Pulivendula road. The University is named after a great thinker, philosopher and social reformer Yogi Vemana, the most celebrated telugu poet of all time. The University college has at present 27 departments with highly qualified faculty members. The University also established Y.S.R Engineering College of Y.V.U. in Proddatur. The University is moving forward with aims like creation and dissemination of knowledge, attainment of enlighten wisdom through advancement learning and progress for the welfare of people in this region. The University has adequate infrastructural facilities, majestic buildings with modern architecture, laboratories with sophisticated instruments and hostels with modern amenities.

**About the Department:** The Department of Environmental Science was established in 2009 with the main objective of developing innovative solutions to different environmental problems that exist in this region. The Department offers both M.Sc and Ph.D. programs. All the faculty are well trained in research and received research grants from various funding agencies.

### **ABOUT THE LECTURE WORKSHOP**

Public health is the science of protecting and improving the health of people and their communities. At present, number of new diseases are spreading day by day due to several reasons including mutated bacteria, viruses etc. Hence awareness of diseases through seminars/workshops is one the best methods to solve the health related issues. Biodiversity consists variety of all living organisms that include diversity within species, between species and of ecosystems in which they inhabit. Most of the species are interdependent, but their existence levels are reducing continuously due to ever increasing pollution and other reasons. Thus conserving biodiversity is one of the main goals since long back. This lecture workshop may be offers an opportunity for faculty, research scholars, students and others with an interest to know more about diseases and their prevention. This event will also provide a good opportunity to learn environment friendly ways in their daily lives as well reduce the loss of biodiversity.

### **INVITED SPEAKERS**

**Dr. N. Ganesh**
