

**YOGI VEMANA UNIVERSITY,
VEMANAPURAM, KADAPA**

Yogi Vemana University, a premier State University established by an Act of the Govt. of Andhra Pradesh in March, 2006, believes in “Creation and Dissemination of Knowledge, attainment of enlightened wisdom through advancement of learning and progress and prosperity of people and social enrichment”. The University is named after a great thinker, philosopher, and social reformer Yogi Vemana, the most celebrated Telugu poet and sage of all time. Prior to this, it was S.V.U. P.G. Center for more than two and a half decades with only four P.G. teaching departments. Y.V. University has twenty seven departments offering courses in Modern sciences, Languages and Humanities at the Post –Graduate level along with 5 year Integrated courses in Bio-technology, Bio-informatics and Earth Science. Y.V. University has received prestigious A.P. Green Award, 2017 and QS-I.GAUGE Gold award on February, 2019.

About the Department: The Department of Psychology was established in the year 2009-2010 with two regular faculty members. At present the Department is offering M.Sc., psychology course along with Ph.D Programmes. The Department was well equipped with psychological testing material and bio-feedback testing along with Wellness centre.

**Two day National seminar
on
Innovations and Challenges in Health
Psychology**

4th & 5th February, 2020

Health psychology focuses on how biology, psychology, behavior, and social factors influence health and well-being. It is the application of psychological knowledge and methods to the study, prevention, and management of physical diseases and disorders. Health psychology is both a theoretical and applied field intended to promote human welfare.

An important development in all developed countries has been the drive to develop evidence-based health care. Mainstream of health psychology is in need of a serious reform. Expansion of the need for medical care has resulted in financial pressures and the inevitable selectivity in the provision of care. In health psychology, models are built to describe, explain, and predict how people become motivated to change their risk behaviors, and how they become encouraged to adopt and maintain health actions.

Objectives of the workshop

- Bio psycho-social approaches to health promotion
- Health care needs across the life span
- Well-being and Health promotion
- Role of Technology on Mental Health issues.
- Indigenous health practices and mental health.
- Community integration in health care.
