About Kadapa

Kadapa city is one of the oldest cities in Andhra Pradesh. It is located in the centre of Rayalaseema geographically. It is well connected to other cities by both bus and train facilities. It lies on Chennai-Tirupati- Hyderabad-Bombay railway line and between Hyderabad-Chennai NH-18

About Yogi Vemana University

Yogi Vemana University, an emerging premier state university among the newly established universities having its head quarters at Kadapa, YSR district, Andhra Pradesh. The main campus of the university is located 15 Km away from Kadapa city on the Kadapa-Pulivendula Road. The University has adequate infrastructural facilities viz., majestic buildings with modern architecture and laboratories with sophisticated instruments and hostels with modern amenities in a serene atmosphere. The University has at present 27 departments with highly qualified and experienced faculty members. The university is moving forward with its aim of creation and dissemination of knowledge, attainment of enlightened wisdom through advancement of true learning, teaching, research and service.

About Department of Zoology

The department was started from the academic year 2008-09. The department is providing academic training for masters degree in Zoology, PhD in Zoology and giving guidance to the students for CSIR-UGC-NET Examination and creating awareness in competitive exams. We are also conducting student seminars, debates etc. to make them strong in academics. The vision of the department is to undertake research work and conduct seminars/conferences both National/ International level on issues like Biodiversity, Conservation, Health education and, Environment.

About the workshop

Animals play an essential role in the development of many areas of science. Despite claims by animal rights leaders, it is undeniable that animal-based research has contributed to significant improvement in the length and quality of our lives. Animal research is the use of non-human animals in experiments for the medical progress. Worldwide more than 100 million different animals used annually. To study the disease mechanism and to develop therapeutic drugs animals are widely used. Proper use of animals, including the avoidance, or minimization of discomfort, distress and pain when consistency with sound scientific practices, is imperative. The main theme of the workshop is to impart knowledge on use of laboratory animals for education and research.

Objectives

- To give an overview on the scope of Animals as a research tools and motivate the students towards research in animal sciences
- This workshop brings together the leading experts in Animal Science Research and discuss the various achievements and usage of animal models
- The lectures of this workshop will highlight the significance of Animal research in medicine, health and environment
- This workshop would facilitates the participants to interact with the leading experts from different areas and helps in moulding their future career

Venue

Seminar Hall
